(54) Title: APPARATUS AND METHOD FOR REPRODUCING INTERACTIVE CONTENTS BY CONTROLLING FONT AC-  
CORDING TO ASPECT RATIO CONVERSION

(57) Abstract: An apparatus and method for reproducing an interactive content with control of a font according to an aspect ratio conversion are provided. The apparatus reproduces an interactive content from an information storage medium. The interactive content includes AV data including audio data and video data, a markup document, and/or a markup resource file. The apparatus includes a font decoder, which determines a pixel aspect ratio of a font according to aspect ratio information and resolution information of an input markup document, enlarges or reduces the font before displaying it, and outputs font data resulting from the enlargement or reduction to a screen on which the interactive content is displayed so as to be adapted to an aspect ratio and a resolution of the screen. Accordingly, the interactive content can be displayed with a minimum distortion.
